SUMMARY

Frontend Engineer with 4+ years building and migrating large-scale React web applications for a leading online travel platform serving millions of users. Focused on product-driven frontend work that moves business metrics — lowering support contact rates, lifting subscription conversion, and improving code quality. Native Portuguese speaker; fluent in English (C1).

TECHNICAL SKILLS

Languages: JavaScript, TypeScript (fundamentals), HTML5, CSS3

Frameworks & Libraries: React, Backbone.js

UI & Design Systems: Figma, Storybook, Fullstory, Thymeleaf

Testing & Quality: Jest, SonarQube (90%+ coverage)

Tools & DevOps: Git, Docker, Datadog, Jira, Confluence

Practices: Agile, Code Review, Micro-services integration, AI-assisted development (Cursor, Copilot)

WORK EXPERIENCE

eDreams — Porto, Portugal (Hybrid)

Software Engineer

Oct 2025 – Present

- Built an intent-recognition help search bar that routes users to the correct chatbot flow, increasing search bar clicks by 112% and reducing phone support contacts by 3.2% (~300 calls) per week.
- Developed product features across a micro-services frontend architecture to improve user self-service and drive contact rate down.
- Implemented transactional email templates with Thymeleaf and Postmark for reliable email delivery.
- Debugged and resolved critical frontend issues using Chrome DevTools and browser Performance APIs.
- Adopted AI development tools (Cursor, Copilot) to speed up delivery and monitored service health in Datadog.

Associate Software Developer

Sep 2022 – Sep 2025

- Contributed to migrating a legacy Backbone.js codebase to React (Desktop and Mobile Web), streamlining the module release process.
- Optimized rendering and design of Support pages, cutting support-team involvement by 10% and contributing to six-figure (€) annual savings.
- Integrated SonarQube across repositories to enforce code quality, maintaining at least 90% code coverage.
- Built reusable UI components in Storybook and launched a new Help Center with Zendesk to improve customer self-service.

Swogo

Software Engineering Intern

Mar 2022 – Jun 2022

- Built customer-profiling dashboards with targeted product-bundle recommendations, increasing bundled-pack purchases by 3%.

EDUCATION

IPVC — Instituto Politécnico de Viana do Castelo

BSc in Computer Science

Sep 2019 – Jun 2022
